Linkedin: <https://www.linkedin.com/in/sravaninelaturi>

Profile Summary

Highly motivated and accomplished Computer Science and Engineering student specializing in Data Science. Experienced in developing end-to-end solutions involving Python, Machine Learning, Deep Learning, and Data Visualization. Successfully delivered internship projects and participated in national-level hackathons.

Education

NRI Institute of Technology - Full-time Bachelor of Technology B-Tech (CSE-DS)

Vijayawada, India

Percentage: 90%

2022-09-30 – 2026-04-01

Sarada Educational Institutions - Full-time Intermediate (12th) - Science

Vijayawada, India

Percentage: 93%

2020-11-07 – 2022-04-04

Experience

AICTE - TechSaksham AI Internship (by Microsoft & SAP)

Virtual Intern - Artificial Intelligence

Remote | 2025-01-01 – 2025-02-01

- Completed hands-on training on AI concepts, use cases, and real-time problem solving. Explored practical applications of machine learning models and AI tools. Gained experience in building intelligent solutions through guided projects.

InfosysSpringboard Internship

Virtual Intern - Artificial Intelligence Intern

Remote | 2025-08-13 – 2025-10-13

- Developed an AI-powered fraud detection system using YOLOv8 to identify visual tampering. Engineered a multi-step verification pipeline that cross-validated Tesseract OCR data against decoded QR code data and mathematically validated numbers using the Verhoeff algorithm. Built and deployed a Flask web application that provided a final "Authentic" or "Fraudulent" verdict with a confidence score for each uploaded document.

Skills

Programming Languages : Python, Java, C, SQL
Libraries/Frameworks : Flask, Pandas, Matplotlib
Tools / Platforms : Power BI, Tableau, VsCode
Databases : SQLite, MongoDB

Projects

Disease Prediction using Machine Learning

Python, Scikit-learn, Flask

Built a Flask web app that predicts diseases based on user symptoms using ML models. Trained and tested multiple classification models using real datasets. Deployed a user-friendly interface for input and dynamic result display.

Energy Consumption Forecasting

Python, Pandas, Scikit-learn

Developed a predictive model to forecast household energy consumption. Used time series data and regression models for accurate predictions. Visualized insights and consumption patterns using Matplotlib and Seaborn.

Predicting Solar Power Output using Linear Regression

Python, Flask, SQLite

Developed a machine learning model to predict solar power output using linear regression. Conducted data preprocessing, model training, and evaluation. Gained hands-on experience in AI-driven analytics with a focus on sustainability and green energy initiatives.

Certifications

- Certified in Python Programming - Infosys Springboard
- Certified in Generative AI - Microsoft Databricks Academy
- Certified in Python (Basics) - HackerRank
